

TIPS TO CARE FOR YOUR KNORK FLATWARE

USE MILD DETERGENTS

Avoid solid, compacted tablets, especially those that feature "Powerballs" This particular formula with the red balls in the middle tend to be harsher, are harder to dissolve, and can cause rust spots to form. Try Gel + Powder packs or all liquid.

AVOID CITRUS SCENTED DETERGENTS

Avoid any "lemon", "lime" or "orange" scented detergents, and opt for a "fresh scent" liquid, gel, or pac. Original blue Dawn is great for hand-washing.

AVOID SOAKING

We suggest using a high heat cycle in your machine, when possible, to dry. Do not leave soaking for long periods of time. Make sure pieces are clean and dry before being put away.

FOR HARD WATER

For those with hard water / high mineral content we suggest Lemi-Shine to remove buildup in machines that can leave items with hard water stains and film.

KEEPING A BRUSHED FINISH

If the pieces that you have are matte finish you can wipe the pieces with a green 3M Scotch Brite pad which will remove any scratches, stains, markings, and rust spots.
